COLLEGE OF AGRICULTURE EXHIBITS AT CHICAGO

The College of Agriculture, University of Missouri struck a rich lead at the International Live Stock Exposition in Chicago in the Hay and Grain Show by making its exhibit purely educational. Each department of the College prepared a poster describing a recent experiment at the college of Agriculture and up-to-date facts, all giving a wealth of information to farmers how to produce a better quality of hay and grain.

Farmers want information and facts and the College believes Educational Exhibits meet their desires. The exhibit was so arranged as to catch attention and interest and meet their needs. "The Door of Opportunity" at the College of Agriculture, how to produce a better quality of everything on the farm is ever open to the farmers.

CHRISTMAS TIMES.

Christmas times in Georgy! know it by the way
The little boy is talkin' 'bout the toys every day;
For he's seen 'em in the winders wher' his mother walked along,
An' "What you goin' to buy me?" is his everlastin' song!

Christmas times in Georgy! jest as sure as fate;
Know it by the little girls that hang 'round the gate,
Wantin' with a kiss for me when evenin' comes along,
An' "What you goin' to buy me?" is their everlastin' song!

Christmas times in Georgy! 'Tears to me that they
Are in a powerful hurry for to 'mind you o' the day;
As if the old-time fellers that's lived so mighty long
Didn't know the time o' Christmas 'thout that everlastin' song!

But thank the Lord, there's some one in the homes 'round us yit
To kiss us all for Christmas so's we never kin forget!
An' thank the Lord for little ones that think the time is long
An' make us young forever with the music o' that song!

Gift Muffs and Furs

Those wonderful plushes that are now known as "wool furs" make neckpieces and muffs that are just as warm, just as handsome and more durable than those made of skins, and they are not at all hard to make. A set made of sea plush is shown here.

CALIFORNIA F. B. CREATES \$1,000,000 CORPORATION

Berkeley, Calif., Dec. 1.—The California Farm Bureau Federation has organized a \$1,000,000 elevator Corporation. A two million bushel terminal elevator at Oakland tidewater has been leased for five years. The corporation will build and operate county elevators in all grain districts of the state. It is planned to market products directly to the consumer.

The formation of this corporation has been accomplished thru the state farm bureau grain marketing association. However, the organization will be no wise financed or operated by the Farm Bureau, but by its own officers. The members will be made up of Farm Bureau members. The formation of this company is but one step in the nation-wide movements of farmers to control the prices of their products until they reach the ultimate consumer.

Mr. Dick was here looking after his farm 1 1-2 miles west of this city. eH tells us that he will open his new coal mine at Herrin, Ill., in the next few weeks. He also said that this was just a small mine, about 300 tons per day, and of course it is compared to some mines, but when we thought of our little pile of coal at \$12.75 per ton, it looks terribly big to us.

The four pictured include a little basket covered with plaited silk, at the upper left, and just below it the puff attached to its cover and ribbon-covered handle. A similar basket, at the right, is surmounted by a little ribbon-dressed doll—a disguised powder puff. At the lower left a glass bowl supports a puff holding a doll's head and at the right a net-covered jar enthrones a Jap baby.
